

### **Hovercraft Universe**

Groep 6: Dirk D., Kristof O., Nick D.F., Olivier B., Pieter-Jan P., Tobias V.B.

# Beschrijving

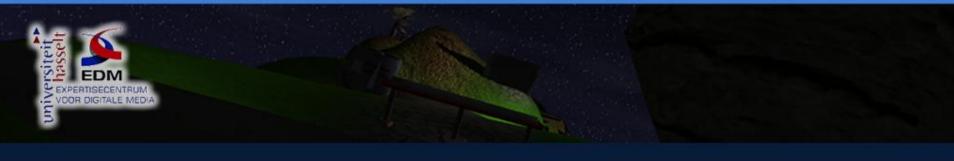

- Race game
- Spelers racen in hovercrafts in de ruimte
- Van planeet naar planeet springen
- Elke planeet heeft verschillende zwaartekracht
  - → Nieuwe atmosfeer + racing behaviour
- Uitbreidbaar m.b.t. wereld, entiteiten, behaviours, Al, ...

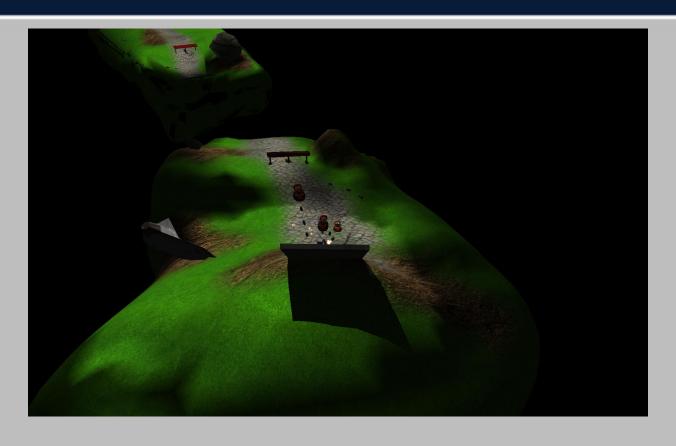

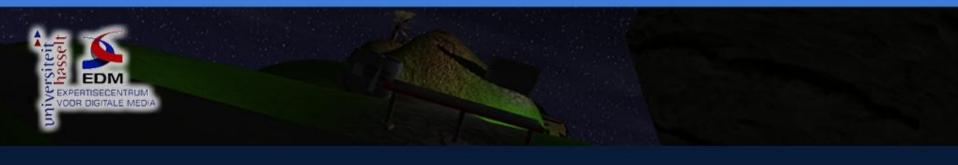

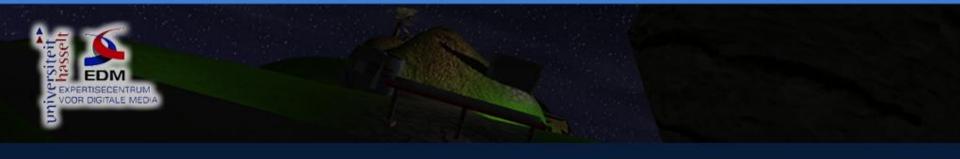

# Video

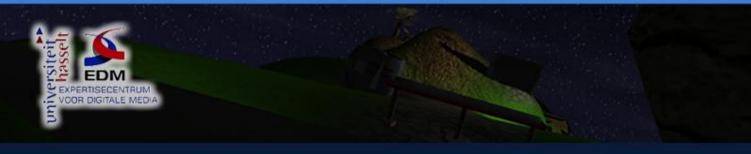

# Rolverdeling

- Kristof Overdulve
  - Algemene client rendering architectuur
  - Ogre visualisatie en animatie
  - 2D artist
  - 3D modellering
- Pieter-Jan Pintens
  - Havok Physics
  - 3D modellering
  - Ogre visualisatie en animatie

# Rolverdeling

- Dirk Delahaye
  - Scripting
  - Al
  - Visuele effecten
  - Configuratiebestanden
- Tobias Van Bladel
  - Input
  - Controls
  - Physics

# Rolverdeling

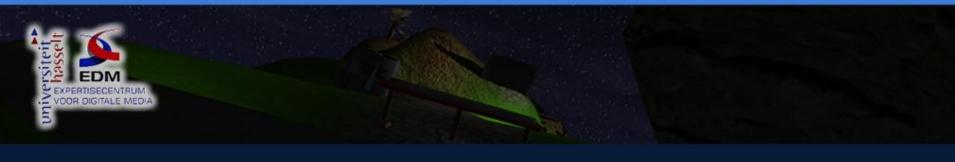

- Nick De Frangh
  - Grafische user interface
  - Geluid
  - Race state
- Olivier Berghmans
  - Algemene server architectuur
  - Netwerk
  - Lobby en race state

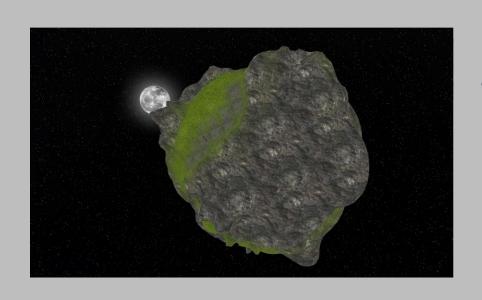

# Core engine

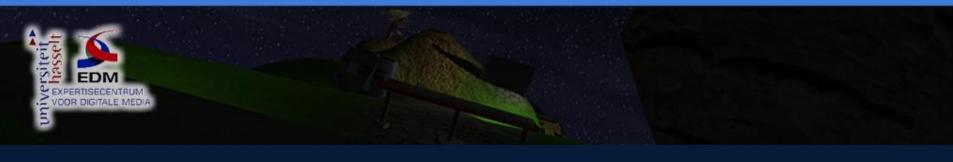

- Shellshock Nam '67[Rouwe:2005]
- Data driven design
- Components
  - Entity(Manager)
  - Representation(Manager)
  - Controller
  - **–** ...

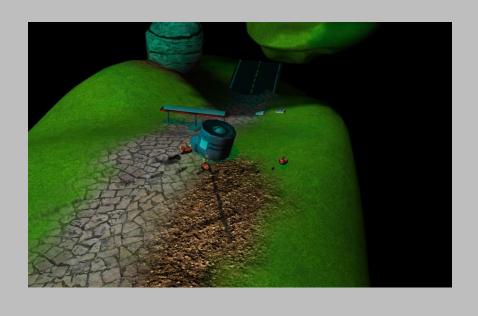

#### Modellen en user-data

- 3DS Max → Ogre via
  OgreMax
- Opslagformaat: .scene
- → Makkelijk aanpasbaar gedrag + uiterlijk

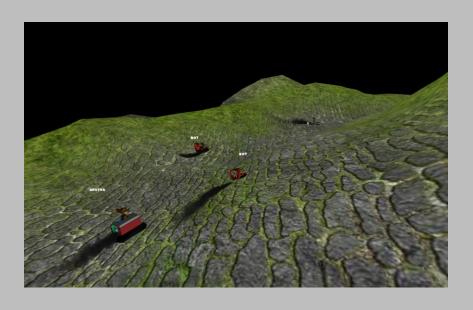

## Visualisatie en Ogre

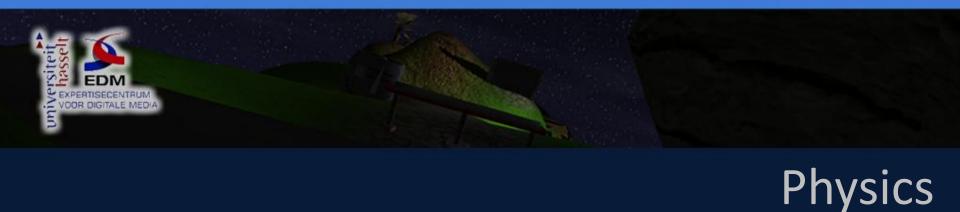

- Particle effecten (rook + vonken bij botsing)
- Real-time schaduwen
- SkyX voor sterrenstelsel
- 5 camera's: (3<sup>rd</sup>, 1<sup>st</sup>, rear-view, freeroam, mario-galaxy)

### Artificial Intelligence

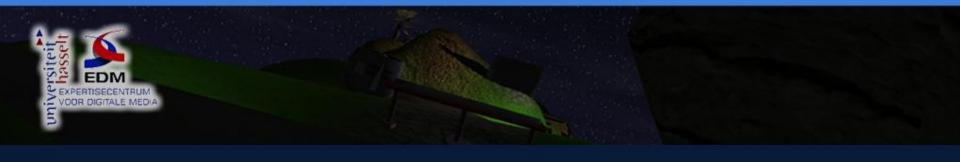

- Scripted AI d.m.v Lua
- Autonome stuursimulaties van Craig Reynolds
- Volgen voorgedefinieerd pad
- Collision avoidance d.m.v. Havok physics

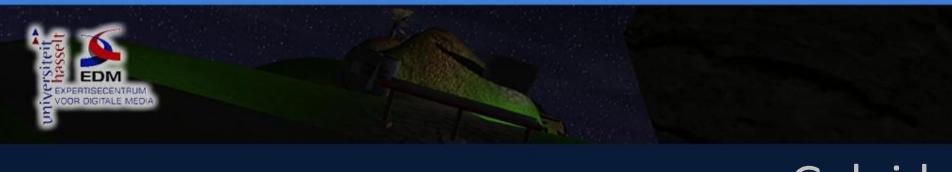

- Physics en collision detection
  - Entity met entity
  - Entity met statisch object
  - Objecten onderling
- Krachten
  - Zwaartekracht
  - Hoveren
  - Jumps

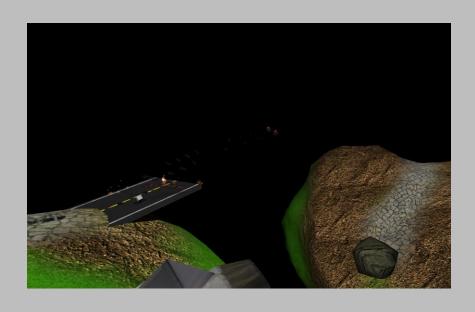

#### GUI

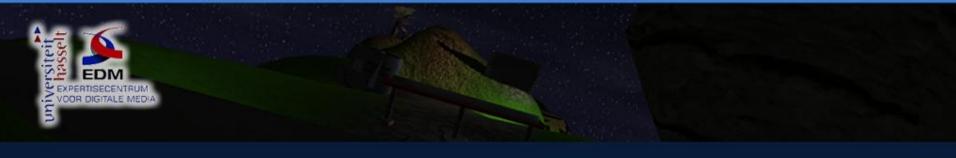

- Flash ActionScript
- Hikari
- Menu's + 2D overlay

### Geluid

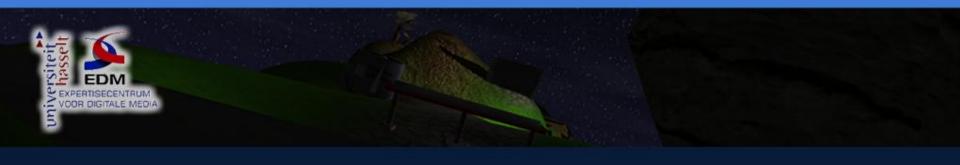

- FMOD
- Achtergrondgeluid
- 3D geluid
- Motorgeluiden aan de hand van snelheid

#### Netwerkstructuur

- Client-server
- Server maakt alle beslissingen!
- Zoidcom:
  - Replicatie en synchronisatied.m.v. proxies
  - Chat

#### Level of Detail

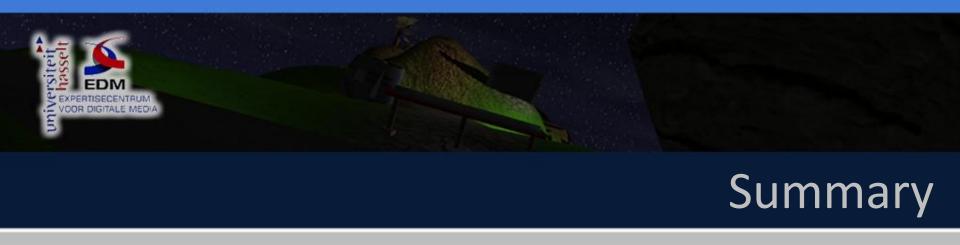

#### Visueel

- Standaard Ogre
- Configureerbaar

#### Netwerk

- Dynamische update frequency
- Afstand- + planeet-based
- Dead reckoning
- Collisions on server

- Het spel is fun! (niet vanzelfsprekend)
- Compleet product (lobby, hovercraft selectie, stabiele multiplayer, ...)
- Data driven design → content creation eenvoudig
- Soccer uitbreiding
